Water Wise Cleaning Products in Williams Lake Area

This list is a work in progress. Using environmentally friendly cleaning products is very important to keep our watersheds healthy. Sewage treatment plants *cannot* remove all harmful chemicals found in household cleaning products. By switching to “greener” less harmful products, you are helping keep water sources cleaner for people, plants, and animals alike.

We recommend using products you have at home such as baking soda and vinegar, or switching to “greener” products listed below*. A great website for more information is www.householdsolutions.org

There are also environmentally friendly *personal care* products such as shampoos, toothpastes, lotions and soaps available at our local health food stores including Sta Well, and other establishments such as the Station House Gallery, Save on Foods, the Gecko Tree, and the Hobbit House.

CLEANING PRODUCTS (BY STORE)
